EDUCATION

University of Southern California

Master of Science in Industrial and Systems Engineering

Cumulative GPA: 3.82/4.0

Coursework: Optimization, Machine Learning, ERP Systems, Supply Chain Analytics

Los Angeles, CA

Aug 2024 – June 2026

University of California, San Diego

Bachelor of Science in Applied Mathematics

Cumulative GPA: 3.6/4.0

San Diego, CA

Sep 2022 – Dec 2023

PROFESSIONAL EXPERIENCE

Zhima Program

AI Systems Engineering

Los Angeles, CA

Dec 2025 - Present

- Built a citation-grounded AI financial research platform combining SEC filing retrieval, technical indicators, market data, and financial news into structured equity research reports with source-linked evidence.
- Implemented a retrieval-augmented generation (RAG) pipeline using EDGAR filings, ChromaDB vector search, and sentence-transformer embeddings to ground AI-generated analysis in primary-source financial documents.
- Developed a production-style architecture using FastAPI and Streamlit, supporting concurrent data orchestration, confidence scoring, thesis validation, and interactive stock analysis workflows.
- Designed a deterministic confidence-scoring system using signal coherence, evidence depth, and data completeness metrics to improve reliability and block unsupported low-confidence outputs.
- Fine-tuned Qwen3-0.6B using LoRA on Finance-Alpaca and synthetic financial datasets, improving domain-specific reasoning for market interpretation, risk analysis, and strategy-generation tasks.
- Built end-to-end financial data preprocessing pipelines including dataset cleaning, augmentation, JSONL conversion, and train/validation workflows for instruction tuning and evaluation.

Shelley Whitman Associate

Project Manager

Los Angeles, CA

June 2025 – Sep 2025

- Managed end-to-end development of Mark's Northeast Furniture e-commerce website, tracking 40+ tasks in **OpenProject** and **Jira** to achieve on-time launch.
- Facilitated daily cross-functional departments (web, graphic, illustration) to resolve obstacles, maintain consistency with client requirements and creative vision, and keep deliverables aligned with client goals.
- Assessed risk exposure and optimized resources allocation across three concurrent design initiatives, cutting overtime hours by **15%**.

SKILLS & ADDITIONAL INFORMATION

- **Programming:** Python, SQL, Java

- **AI/ML:** PyTorch, Transformers, BERT, GPT, LSTM, Scikit-learn
- **LLM Systems:** RAG, LoRA Fine-Tuning, Prompt Engineering, AI Agents, Vector Databases
- **Frameworks & Tools:** FastAPI, Streamlit, Hugging Face, ChromaDB, Pandas, Git, OpenProject, MS Project, Jira
