EDUCATION

University of Southern California

Master of Science in Industrial and Systems Engineering

Cumulative GPA: 3.82/4.0

Coursework: Optimization, Machine Learning, ERP Systems, Supply Chain Analytics

Los Angeles, CA

Aug 2024 – June 2026

University of California, San Diego

Bachelor of Science in Applied Mathematics

Cumulative GPA: 3.6/4.0

San Diego, CA

Sep 2022 – Dec 2023

PROFESSIONAL EXPERIENCE

Zhima Program

AI Systems Engineer

Los Angeles, CA

Dec 2025 - Present

- Built a citation-aware equity research assistant that synthesizes SEC filings, market data, technical indicators, and financial news into structured AI-generated research reports with source-linked evidence.
- Developed a retrieval-augmented generation (RAG) pipeline using EDGAR filings, ChromaDB vector search, and sentence-transformer embeddings to ground analysis in primary-source financial documents.
- Architected a production-style FastAPI + Streamlit system with concurrent data orchestration, confidence scoring, thesis validation, and graceful degradation when external data sources become unavailable.
- Designed a deterministic confidence-evaluation framework combining data completeness, signal coherence, and evidence depth metrics to block unsupported low-confidence outputs and improve system reliability.
- Implemented Redis-based caching with workload-specific expiration policies for market data, financial news, SEC retrieval, and report generation, reducing redundant API calls and improving response latency.
- Containerized frontend and backend services using Docker and Docker Compose and established CI/CD validation pipelines with GitHub Actions for automated testing and deployment verification.
- Fine-tuned Qwen3-0.6B using LoRA on Finance-Alpaca and synthetic financial datasets, building automated data preprocessing, augmentation, and evaluation pipelines for domain-specific financial reasoning.

Shelley Whitman Associate

Project Manager

Los Angeles, CA

June 2025 – Sep 2025

- Managed end-to-end development of Mark's Northeast Furniture e-commerce website, tracking 40+ tasks in **OpenProject** and **Jira** to achieve on-time launch.
 - Facilitated daily cross-functional departments (web, graphic, illustration) to resolve obstacles, maintain consistency with client requirements and creative vision, and keep deliverables aligned with client goals.
 - Assessed risk exposure and optimized resources allocation across three concurrent design initiatives, cutting overtime hours by **15%**.
-

SKILLS & ADDITIONAL INFORMATION

- **Programming:** Python, SQL, Java
- **AI/ML:** PyTorch, Transformers, Hugging Face, Scikit-learn, Sentence Transformers, BERT, LSTM
- **LLM Systems:** RAG, LoRA Fine-Tuning, AI Agents, Vector Databases, Prompt Engineering
- **Backend & Infrastructure:** FastAPI, Redis, Docker, Docker Compose, GitHub Actions, REST APIs
- **Frameworks & Tools:** Streamlit, ChromaDB, Pandas, Git, OpenProject, MS Project, Jira
